

SURFACE COLLECTION

HPL · PET FILM · PVC FILM

Coordinated decorative surfaces for furniture, interiors
and commercial environments.

ONE COORDINATED SURFACE LANGUAGE

Boreviac aligns surface design, substrate selection and production requirements so color, finish and performance stay consistent from sampling through repeat orders.

COLLECTION SCOPE

HPL

Our flagship high-pressure laminate for demanding furniture and interior surfaces.

PET FILM

High-gloss, super-matte and metallic finishes for refined decorative panels.

PVC FILM

Thermoformable decorative film for shaped doors, furniture and interior components.

A compact material system—organized by performance first, then by décor.

CHOOSE THE SURFACE BY PERFORMANCE

HPL leads the collection for high-contact applications; PET and PVC extend the finish and forming options.

HPL

Heat, wear and stain resistance for demanding surfaces.

PET FILM

Refined gloss and super-matte finishes with a clean visual depth.

PVC FILM

Flexible wrapping performance for shaped furniture components.

HPL

FLAGSHIP HIGH-PRESSURE LAMINATE

HPL — OUR FLAGSHIP SURFACE

High-pressure laminate combines resin-impregnated kraft paper and decorative paper under heat and pressure to create a dense, durable surface sheet.

PERFORMANCE

Heat & flame resistance

Improved surface resistance for kitchens, hospitality and commercial interiors. Final fire rating depends on the complete panel assembly.

Stain resistance & easy care

A practical finish for cabinets, work surfaces, wall panels and high-traffic spaces.

Scratch & abrasion resistance

A dense surface designed for repeated contact, cleaning and everyday furniture use.

Five coordinated décor families

Wood, stone, fabric, metal and solid colors—organized as one HPL collection.

Typical applications: cabinetry · wardrobes · retail · hospitality · healthcare · offices · wall panels

BUILT FOR HIGH-CONTACT INTERIORS

HPL supports coordinated cabinetry, wall panels and furniture where daily impact, frequent cleaning and repeatable décor matter.

COMMERCIAL-GRADE USE

Durable surfaces for hospitality, retail and workplace interiors.

DESIGN CONSISTENCY

One visual language across wood, stone, textile, metal and solid designs.

PET FILM

HIGH-GLOSS · SUPER-MATTE · METALLIC

PET DECORATIVE FILM

A refined decorative surface for flat-laminated cabinetry and furniture fronts, available in high-gloss, super-matte and metallic directions.

Refined appearance

Clean, uniform surfaces for contemporary furniture and interior design.

Finish options

High-gloss, super-matte, metallic and pearlescent effects.

Production ready

Suitable for flat lamination on properly prepared furniture panels.

Project value

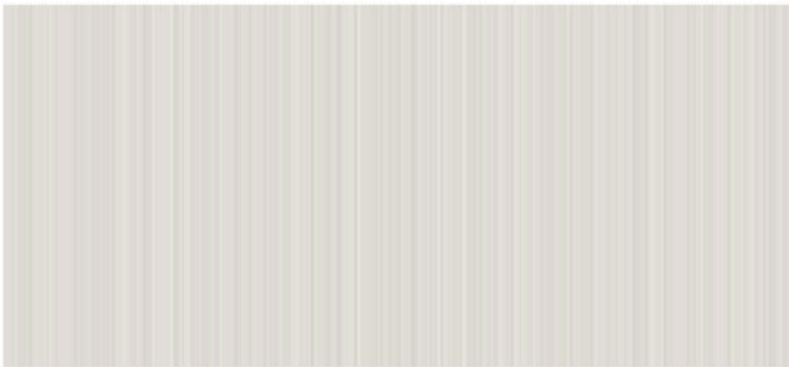

A coordinated palette for residential, hospitality and commercial interiors.

Best suited to flat decorative panels where visual refinement and consistent finish are priorities.

PET FILM APPLICATIONS

Specify PET film when clean visual depth and a refined furniture finish are the main design priorities.

01 **Premium cabinet doors**

High-gloss or super-matte fronts for kitchens and fitted furniture.

02 **Wardrobes and vanities**

Coordinated finishes for residential storage and bathroom furniture.

03 **Furniture fronts**

A consistent decorative surface for modern flat-panel production.

04 **Interior feature panels**

Selected applications requiring controlled gloss and color consistency.

Confirm substrate preparation, adhesive and lamination conditions before production.

PVC FILM

WOOD · STONE · SOLID · TEXTILE

PVC DECORATIVE FILM

A flexible decorative film for vacuum pressing, profile wrapping and shaped furniture components, offered in wood, stone, solid and textile directions.

Formability

Designed for profiled doors and three-dimensional furniture surfaces.

Décor range

Woodgrain, stone, concrete, solid and textile-inspired effects.

Applications

Cabinet doors, wall panels, furniture fronts and wrapped profiles.

Project value

Flexible design coordination across multiple interior components.

Best suited to shaped parts where the film must follow edges, profiles and routed details.

PVC FILM APPLICATIONS

Use PVC film where decorative coverage must continue across profiled, wrapped or curved components.

01 **Vacuum-pressed cabinet doors**

Continuous coverage across routed profiles and shaped door faces.

02 **Profile wrapping**

Decorative finishing for mouldings, frames and linear components.

03 **Wall panels and furniture**

Coordinated wood, stone, solid and textile looks for interiors.

04 **Curved components**

Flexible surface coverage for selected three-dimensional furniture parts.

Confirm film grade, forming temperature, adhesive and substrate geometry before production.
